1 Introduction to CSA s 2.0

The second-generation Nedcon Configuration and Sales Application (CSA 2.0) consists of a product configuration platform **called CET Designer**, developed by Configura AB, and the **Nedcon extension** developed by Nedcon BV. Users need both components to configure Nedcon racking systems and plan their storage space.

2 Trial version for 30 days

2.1 Terms

Users can test Nedcon CSA 2.0 for 30 days free of charge. After the trial period, users will be asked to pay an annual license fee.

The system requirements for installing the application can be found here:

https://www.configura.com/products/system-recommendations#cet-designer

2.2 Create a MyConfigura account

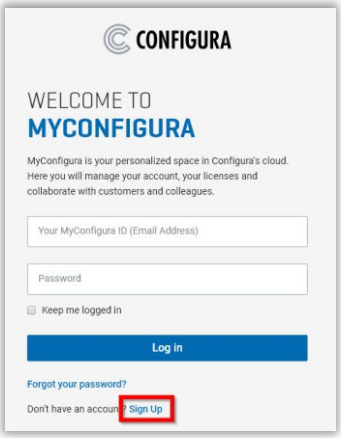
The user needs a MyConfigura account to download **CET Designer** and the **Nedcon extension**
.

MyConfigura is the user's personalized area in the Configura Cloud. The MyConfigura account provides users with easy access to a wide range of Configura services. Here, users can manage their licenses, collaborate, and get help.

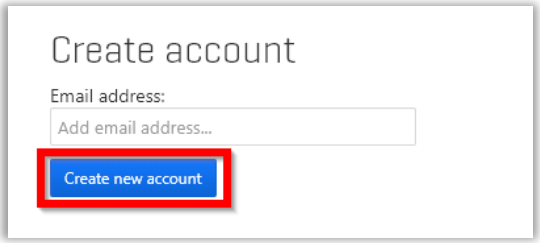
1. Go to: www.configura.com

2. Click on the user icon in the navigation bar:

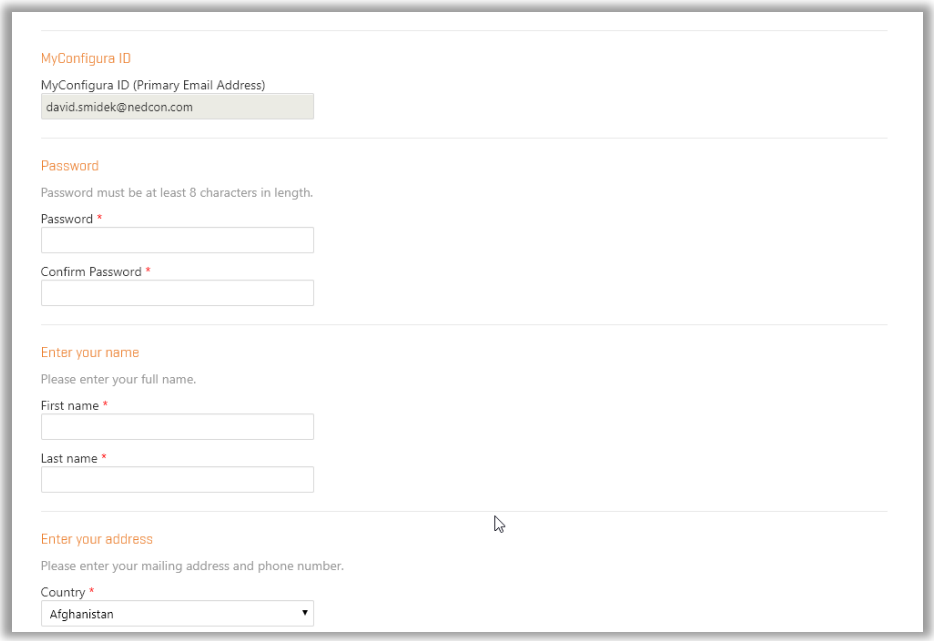
3. You will the MyConfigura login screen will be displayed. Click on on **Sign In**.

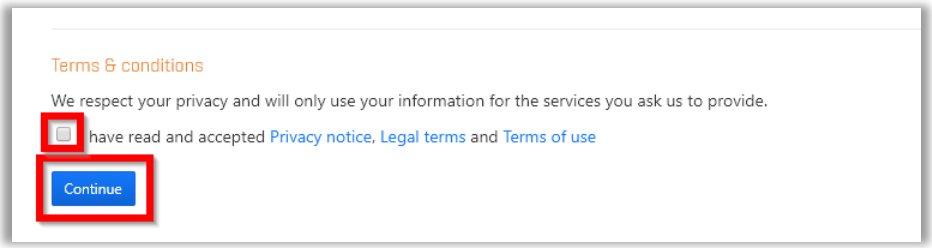


4. Enter your primary email address as your MyConfigura ID. You can change this later in your account. Then click Create New Account.

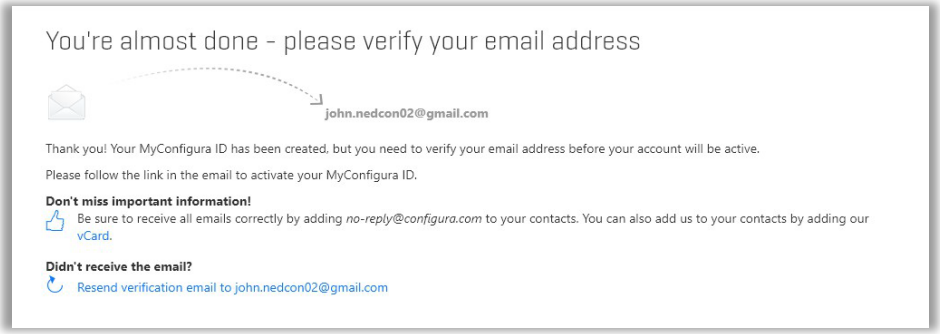


5. Fill out the registration form, confirm the terms and conditions, and click Continue.

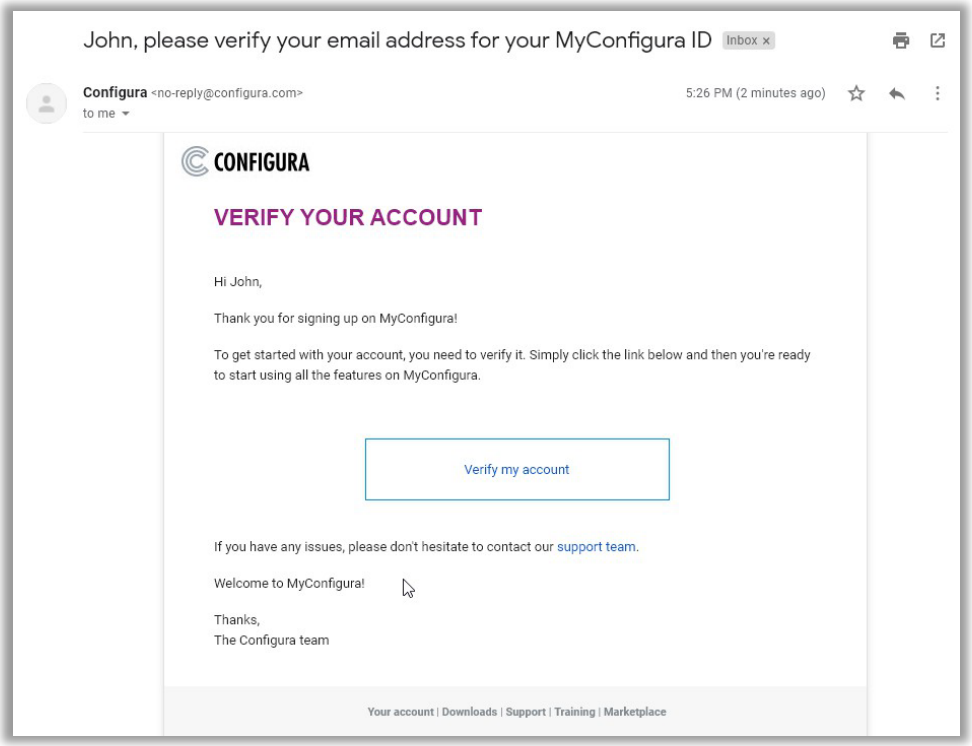




6. You will automatically receive an email to confirm your email address:



7. Go to your email account, open the email from mailto:no-reply@configura.comund, and click on Verify my account.

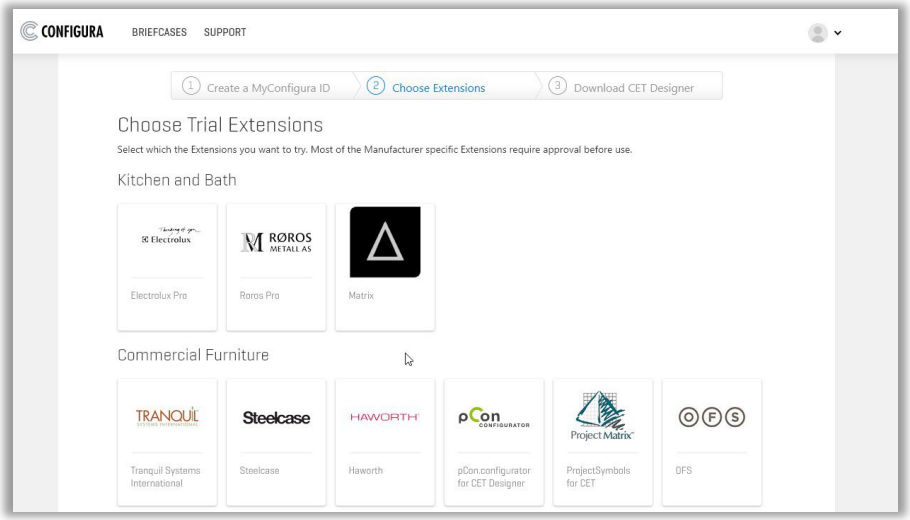


8. That's it. Your MyConfigura account has been created and verified.

9. If you want to access or change your MyConfigura account in the future, go to http://www.configura.com and click on the MYCONFIGURA icon in the navigation bar:

2.3 Select Nedcon Extension and other extensions

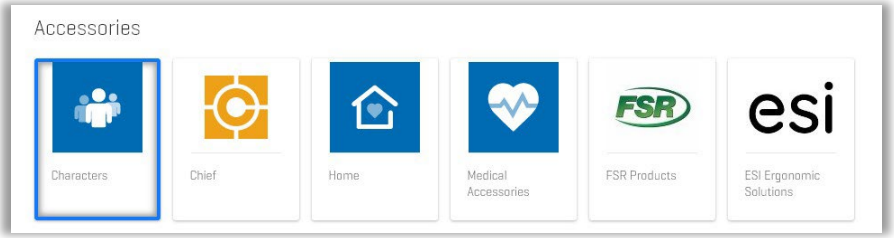
1. You will be automatically redirected to **the marketplace**. Here you can select which licenses you would like to try out.

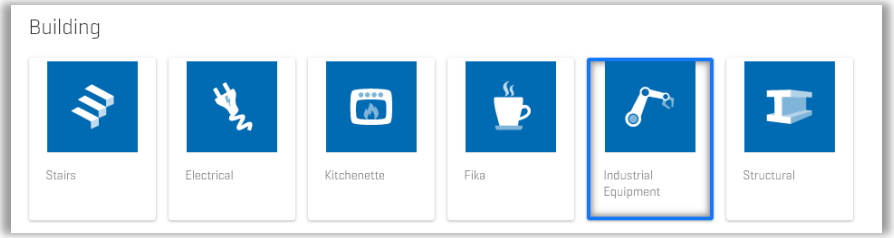


2. Scroll to the Material Handling section and click on Nedcon. It will be selected.

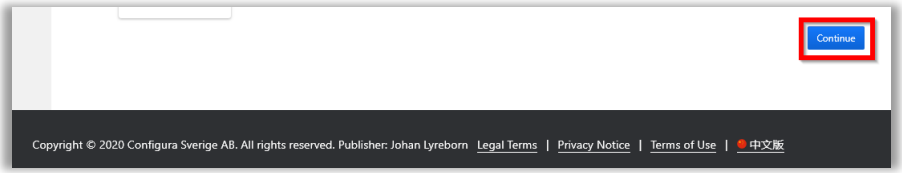
3. Select other extensions you would like to try. This is optional. Nedcon recommends also selecting the following:

- in the Accessories section, the Characters extension (to add people),
- in the Buildings section, the Industrial Equipment extension (to add forklifts, etc.).

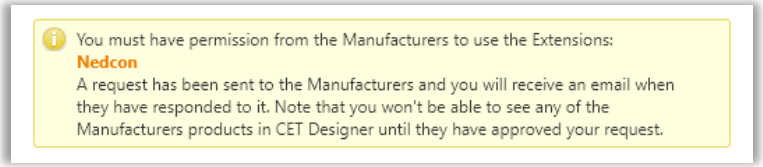




4. Scroll to the bottom of the page and click Continue.



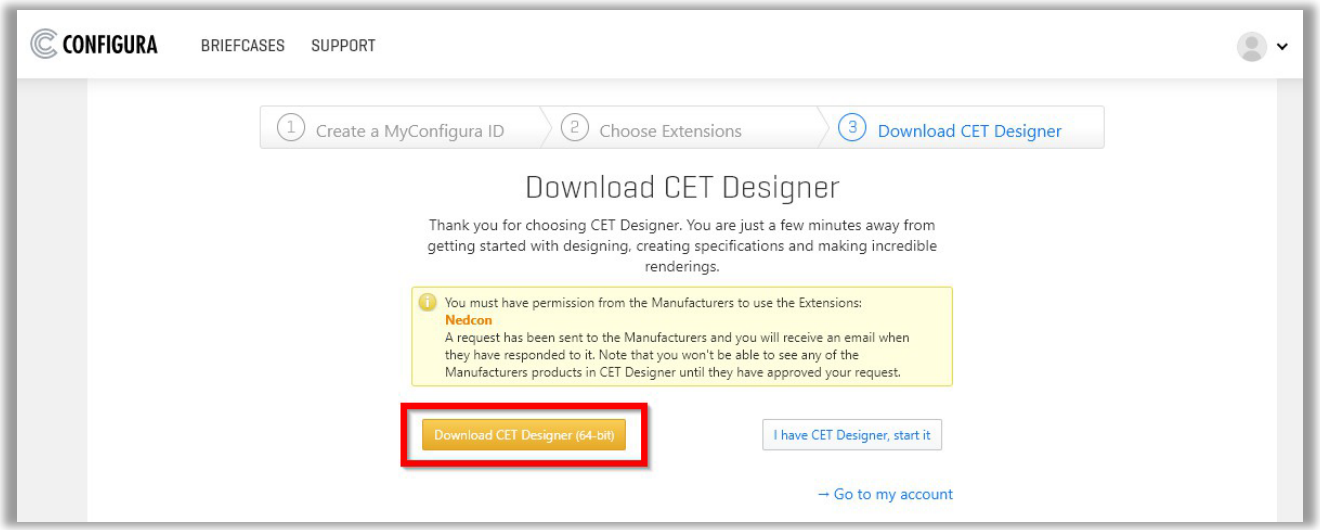
5. An automatic notification will be sent to Nedcon. You will receive an email when Nedcon has approved your request.



Please note that you will only be able to see and use the Nedcon extension in CET Designer after this!

2.4 Download CET Designer and install

1. You will be automatically redirected to the download page. Click on Download **CET Designer (64-bit)**.



2. You will be prompted to download the installation file CET Designer xx.x.xx.x 64-bit.msi. It is approximately 250 MB in size. Save it to your local device.

3. Open the CET Designer xx.x.xx.x 64-bit.msi file and install it. Just follow the instructions.

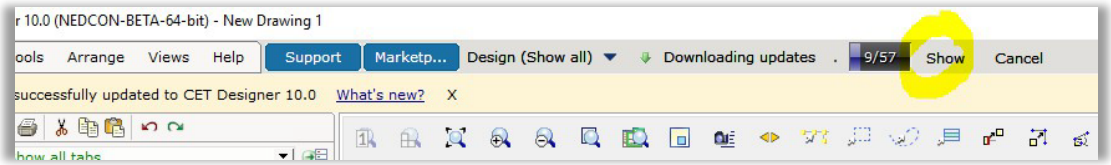
4. You will be asked to log in. Please use the data you created in MyConfigura.

5. Start CET Designer using this **icon**.

6. The CET Designer will start and automatically download the extensions you have selected, the associated catalog data, and all relevant updates. This process may take a few minutes, so please be patient.

The Nedcon extension is automatically downloaded by CET Designer as soon as Nedcon has approved your request to use it.

You can view the update progress in the top toolbar and by clicking the **Show** button next to Download Updates.



7. Once the extensions have finished downloading, you will be prompted to restart CET Designer.

8. Congratulations! You can now use CSA 2.0, the Nedcon Rack Configuration and Sales application.

--- End of installation instructions —
